We can help you to transform your space into a dreamy oasis.

Designing a small space doesn't have to be complicated. Whether you're jazzing up an apartment, loft, or condo, we've got some tips that will make the process creative and fun. Leaving you with a space that is stylish and functional.

- 1 Utilize your vertical space:** Yes, use your walls. Your walls are vertical real estate. When designing small spaces one uses their wall space wisely. Think shelves, wall-mounted planters, funky hooks, and anything that doubles as storage to keep your floor plan open and airy.
- 2 Let's talk scale:** Furniture size matters. Don't go for the oversize, but you also don't want your items small. But create a balance. Opt for furniture that fits just right. Modular furniture is always best for small spaces allowing you to be creative when furnishing your space.
- 3 Create Sections:** Carve out little 'rooms' within your room. Even the smallest studio can have "rooms" without walls. Define each area with purpose. Create a place to work or a nook to relax. Use area rugs to outline each zone. Screens are also a stylishly way to split up spaces while adding an element of intrigue to your layout.
- 4 Accessorize Smartly:** Accessories are like the jewelry of room design. They need to be smart. Think multipurpose items like ottomans with sneaky storage inside. Or, nesting tables that tuck away neatly. Use mirrors, bounce light around and make the room feel bigger.

So stop pulling out your hair. Designing small spaces doesn't have to be a headache-inducing nor does it mean you have to downscaling your dreams. It is more about unleashing your inner creativity.
